### The Challenge:

Your challenge is to create a piece of art using a battery-powered LED light source that demonstrates at least two interactions with light. In addition to your LED light source(s), you can use materials that may include recyclables, trash, borrowed objects (each of which is no more than \$10), and items found in nature. Your submission must include a video demonstration (max 30 seconds) that shows off your art work and a text description that explains your design and its light interactions. For student safety, no lasers are allowed. Be sure to review the CONTEST RULES and DESIGN GUIDELINES for all challenge details. Be brilliant... and good luck!

### Program Dates
