

THE EGG DROP VIDEO CHALLENGE

DESIGN GUIDELINES

Below are guidelines to keep in mind when making your Egg Drop video submission. We encourage participation first and foremost, so remember that you won't be disqualified if your entry doesn't comply with every guideline, but if you do, your entry will score higher!

GOOD LUCK!

EGG DROP GUIDELINES

Per the contest rules, your egg must survive an 8 foot drop and your invention may use paper plates, straws, balloons, rubber bands, paper cups, and/or tape. There is no limit to the amount of materials you can use, but you will be scored based on size of your design. For this challenge, "less is more".

Here is what we'd like to see in your entry:

- In your text description, specify the materials used in your design, including how many of each item was used.
- Do not wrap your egg in tape. We need to see whether it cracked or not.
- A raw egg = a raw chicken egg. No quail eggs, snake eggs, ostrich eggs, or other eggs allowed. :)
- To conduct the drop test, please get the assistance of your teacher or parent. They can drop the egg, while you record the video!

VIDEO & THUMBNAIL GUIDELINES

Per the contest rules, you may submit ONE video (max 200 MB). This is what we hope to see:

- Vertical video is preferred for better detail. After the drop, move towards the egg or zoom in to show the results of the egg drop and whether the egg survived!
- As a reminder... please frame out faces. We cannot accept entries with faces or voices. (See the contest rules for more detail.)
- Your video can be one video clip taken from a camera, or it can be an edited video. 30 seconds is our preferred maximum, but we understand that it takes time to dig out the egg sometimes.
- Max 3 MB Thumbnail image will be the cover image for your entry in the submission gallery. We advise using a photo of your design before the drop to provide detail of your design.

Please review the CONTEST RULES and do not submit any videos or photos with faces, voices, or music!
