

THE CLIMATE CUBE

SCHOOL: HARTSELLE JUNIOR HIGH SCHOOL

LOCATION: HARTSELLE, AL

FLIGHT PROVIDER: WORLD VIEW

GRADES: JR HIGH SCHOOL

STUDENT EXPERIMENT DESCRIPTION

Our experiment focuses on the occurrence of acid rain. We are studying how to predict when acid rain will occur. We are also looking into how the percentage of CO2 changes the higher you get into the atmosphere. All components of our experiment are to study and prevent climate change. We hope to use the data collected to help find solutions to better the planet.
