

KITTIES IN SPACE

- _____  **SCHOOL:** EAST LIVERPOOL HIGH SCHOOL
- _____  **LOCATION:** EAST LIVERPOOL, OH
- _____  **FLIGHT PROVIDER:** AEROSTAR
- _____  **GRADES:** HIGH SCHOOL

STUDENT EXPERIMENT DESCRIPTION

In our experiment we are testing what would happen if we could send a cat to space. We have designed an astronaut suit for a cat and we will use sensors that we placed inside the suit to measure things such as radiation, temperature, humidity, pressure, and Co2. We chose this as our project because if we can find a way to successfully send a cat to space it could be very beneficial to astronauts' mental health.
